1. Introduction

1.1 Purpose

FreshStart is a web-based job portal designed specifically for fresh graduates and final-year students. The system provides verified internship and entry-level job opportunities while reducing fake job postings through employer verification.

1.2 Problem Statement

Fresh graduates often struggle to find trustworthy jobs because:

- Many fake and scam job postings exist.

- Most jobs require previous experience.
- Job application processes are lengthy and repetitive.
- Existing platforms mainly focus on experienced candidates.
- Students from smaller cities have fewer opportunities.

FreshStart aims to solve these problems by providing a secure, simple, and skill-based job portal.

1.3 Objectives

- Provide verified job opportunities for fresh graduates.
- Reduce fake job advertisements.
- Simplify the application process.
- Match students with suitable jobs based on their skills.
- Increase employment opportunities in smaller cities.

1.4 Scope

The system includes:

- Student Registration
- Employer Registration
- Employer Verification
- Job Posting
- Job Search
- Skill-Based Job Matching
- One-Click Apply
- Application Tracking
- Admin Management

---

2. Overall Description

FreshStart is a web application consisting of three user roles.

Student

Students can:

- Register/Login

- Complete profile
- Upload resume
- Add skills
- Search jobs
- Apply with one click
- Track applications

Employer

Employers can:

- Register company
- Submit verification documents
- Post jobs
- Edit jobs
- View applicants
- Manage job listings

Admin

Admin can:

- Verify employers
- Approve or reject companies
- Manage job postings
- Remove fake jobs
- Manage students
- Generate reports

---

3. System Modules

Student Module

- Registration
- Login
- Profile Management
- Resume Upload
- Skills Management

- Job Search
- Skill Matching
- One-Click Apply
- Application History

Employer Module

- Company Registration
- Employer Verification
- Job Posting
- Edit/Delete Jobs
- View Applicants
- Manage Applications

Admin Module

- Admin Login
- Employer Verification
- Job Approval
- User Management
- Report Management
- Dashboard

---

4. Functional Requirements

FR-01 Student Registration

The system shall allow students to register using:

- Full Name
- Email Address
- Phone Number
- Password
- University
- City

FR-02 Student Login

Students shall log in using:

- Email
- Password

FR-03 Student Profile

Students shall manage:

- Personal Information
- Skills
- Education
- Resume
- Preferred Job Location

FR-04 Employer Registration

Employers shall register by providing:

- Company Name
- Official Company Email
- Phone Number
- Company Address
- Password

FR-05 Employer Verification

Before posting jobs, employers must submit verification details.

Only verified employers shall be allowed to publish jobs.

FR-06 Job Posting

Verified employers shall enter:

- Job Title
- Job Description
- Required Skills
- Qualification
- Job Type (Internship / Entry-Level)
- City
- Salary (Optional)
- Application Deadline

FR-07 Job Search

Students shall search jobs using:

- Job Title
- Skills
- City
- Company Name
- Job Type

FR-08 Skill-Based Matching

The system shall recommend jobs according to:

- Student Skills
- Subjects Studied (Coursework)
- Preferred Location

FR-09 One-Click Apply

Students shall apply using their saved profile and uploaded resume without filling the form repeatedly.

FR-10 Application Tracking

Students shall view:

- Applied Jobs
- Pending Applications
- Accepted Applications
- Rejected Applications

FR-11 Admin Dashboard

The admin shall:

- Manage employers
- Verify companies
- Manage jobs
- Remove fake job postings
- View reports

---

5. Employer Verification Requirements

Purpose

To reduce fake companies and scam job postings, every employer must complete the verification process before posting jobs.

Verification Documents Required

The employer shall provide the following information and documents:

- Company Name
- Official Company Email Address
- Phone Number
- Company Address
- Business Registration Number
- Business Registration Certificate (Upload PDF/Image)
- National Tax Number (NTN) Certificate *(Optional but recommended)*

Verification Process

1. Employer creates an account.
2. Employer submits the required company details and documents.
3. The employer's account status becomes **Pending Verification**.
4. Admin reviews the submitted information.
5. Admin may:
    - Approve the employer
    - Reject the employer
6. Only approved employers can post job advertisements.

Verification Status

Status	Description
Pending	Waiting for admin verification
Approved	Employer can post jobs
Rejected	Employer cannot post jobs

---

6. Non-Functional Requirements

Performance

- System response time should be less than 3 seconds.
- Support multiple users simultaneously.

Security

- Password encryption
- Secure login authentication
- Role-based access
- Only verified employers can post jobs

Reliability

- Regular database backup
- Stable system performance

Usability

- User-friendly interface
- Responsive design
- Easy navigation

Availability

The system should be available 24/7.

---

7. External Interface Requirements

Hardware Requirements

- Desktop Computer
- Laptop
- Smartphone

Software Requirements

- Windows Operating System
- Visual Studio 2022
- ASP.NET Core MVC
- SQL Server
- Web Browser

User Interface

The system contains:

- Home Page
- Login
- Student Registration
- Employer Registration
- Student Dashboard

- Employer Dashboard
- Admin Dashboard
- Job Listings
- Job Details
- User Profile
- Application History

---

8. Database Requirements

Student Table

- StudentID
- FullName
- Email
- Phone
- Password
- University
- City
- Skills
- Resume
- Coursework
- PreferredLocation

Employer Table

- EmployerID
- CompanyName
- OfficialEmail
- PhoneNumber
- CompanyAddress
- Password
- VerificationStatus

- Remove Fake Listings
- Generate Reports

---

10. Future Enhancements

- AI-powered job recommendations
- Resume Builder
- Interview Scheduling
- Email Notifications
- Employer-Student Chat
- Mobile Application (Android & iOS)

- Online Skill Assessment
- Job Recommendation using Machine Learning

---

11. Conclusion

FreshStart is a secure and user-friendly job portal developed for fresh graduates and final-year students. It focuses on providing verified internship and entry-level job opportunities while reducing fake job postings through employer verification. With features such as skill-based job matching, one-click applications, location-based filtering, and application tracking, the system simplifies the job search process and helps students begin their careers with confidence. It also provides employers with a reliable platform to connect with qualified candidates, making the recruitment process more efficient and trustworthy.
